Evolution of Our Organization

Global ADE began its mission with the core belief in the transformative value of education and a commitment to a partnership with each local community or village in which we established a school.

Today we want to update you on some changes at Global ADE that are a direct reflection on those values.

Empowerment of Our Schools

We are pleased to report to you that we are transitioning two of our schools out of our day-to-day management to more local control. The CEDO school and the CCD school, which were established in 2011 and 2015 respectively, will be leaving our ‘incubator’ in favor of working directly with their local communities.

Strengthening education in developing countries
